Urolithiasis

| Topic | Article | Author | Published | Reference |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Urolithiasis | Hybrid lithotripsy for a staghorn renal calculus: a novel minimally invasive approach | Chaiyong Naulyong, Thawatchai Taweemonkongsap, Ekkarin Chotikawanich | 2018 TJU 39-1 | Naulyong C, Taweemonkongsap T, Chotikawanich E. Hybrid lithotripsy for a staghorn renal calculus: a novel minimally invasive approach. TJU 2018; 39 (1):48-53. |
| Urolithiasis | Diagnostic role of urine C-reactive protein levels on ureteral stone disease | Ozer Guzel, Yilmaz Aslan, Altug Tuncel, Cagdas Senel, Ahmet Asfuroglu, Esra Firat Oguz, Fatma Meric Yilmaz, Melih Balci | 2018 TJU 39-2 | Guzel O, Aslan Y, Tuncel A, et al. Diagnostic role of urine C-reactive protein levels on ureteral stone disease. TJU 2018; 39 (2): 35-41. |
| Urolithiasis | Relationship between the spontaneous passage rates of ureteral stones less than 10 mm and serum C-reactive protein levels, white blood cell count and neutrophil percentages | Atikhun Puntub, Weelak Lerdpraiwan | 2018 TJU 39-2 | Puntub A, Lerdpraiwan W. Relationship between the spontaneous passage rates of ureteral stones less than 10 mm and serum C-reactive protein levels, white blood cell count and neutrophil percentages. TJU 2018; 39 (2): 42-49. |
| Urolithiasis | Prevalence and risk factors of post obstructive diuresis after percutaneous nephrostomy in obstructive nephropathy patients | Kaisorn Limjunyawong, Vorapot Choonhaklai, Viroj Chittchang, Danaiphand Akarasakul, Somkiat Pumpaisanchai, Nattapong Wongwattanasatien, Tanet Thaidumrong | 2017 TJU 38-2 | Limjunyawong K, Choonhaklai V, Chittchang V, et al. Prevalence and risk factors of post obstructive diuresis after percutaneous nephrostomy in obstructive nephropathy patients. TJU 2017; 38 (2):8-19. |
| Topic | Article | Author | Published | Reference |

| | | | | |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Urolithiasis | Association of Infundibulopelvic Angle, Infundibulum Width, Infundibulum Length and Lower Pole Ratio on Stone Clearance after Shock Wave Lithotripsy | Chettha Thanakhon, Vorapot Choonhaklai | 2016 TJU 37-2 | Thanakhon C, Choonhaklai V. Association of infundibulopelvic angle, infundibulum width, infundibulum length and lower pole ratio on stone clearance after shock wave lithotripsy. TJU 2016; 37 (2): 19-28. |
| Urolithiasis | Additional Pain Control during Extracorporeal Shockwave Lithotripsy (ESWL) Using Etoricoxib, Randomized-control Trial | Piyawat Tantanatip, Manint Asawachintachit | 2016 TJU 37-2 | Tantanatip P, Asawachintachit M. Additional pain control during extracorporeal shockwave lithotripsy (ESWL) using Etoricoxib, randomized-control trial. TJU 2016; 37 (2): 29-35. |

Tumor

| Topic | Article | Author | Published | Reference |
|-----------------|------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tumor - penis | Suture flap fixation reduces lymphatic drainage after inguinal node dissection in penile cancer patients | Chaowat Pimratana | 2018 TJU 39-1 | Pimratana C. Suture flap fixation reduces lymphatic drainage after inguinal node dissection in penile cancer patients. TJU 2018; 39 (1):36-41. |
| Tumor- prostate | Outcomes of low-dose-rate brachytherapy for clinically localized prostate cancer: Phramongkutklao Hospital | Weerayut Wiriyabanditkul, Weelak Lerdpraiwan, Bundith Kanjanapayak | 2017 TJU 38-1 | Wiriyabanditkul W, Lerdpraiwan W, Kanjanapayak B. Outcomes of low-dose-rate brachytherapy for clinically localized prostate cancer: Phramongkutklao Hospital. TJU 2017; 38 (1):20-30 |
| Topic | Article | Author | Published | Reference |

|--------------------|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tumor -testis | Clinical Features and Treatments Outcome of Testicular Germ Cell Tumor in Rajavithi Hospital | Annop Chaiphonkaew, Vorapot Choonhaklai, Danaiphand Akarasakul, Nattapong Wongwattanasatien, Tanet Thaidumrong, Somkiat Pumpaisanchai, Viroj Chittchang | 2016 TJU 37-1 | Chaiphonkaew A, Choonhaklai V, Akarasakul D, et al. Clinical features and treatments outcome of testicular germ cell tumor in Rajavithi Hospital. TJU 2016; 37 (1):1-9. |
| Tumor - urothelial | Nephroureterectomy for upper urinary tract transitional cell carcinoma in Rajavithi Hospital: Experience in the last 8 years | Karan Rimthephathip, Nattapong Wongwattanasatien | 2017 TJU 38-1 | Rimthephathip K, Wongwattanasatien N. Nephroureterectomy for upper urinary tract transitional cell carcinoma in Rajavithi Hospital: Experience in the last 8 years. TJU 201; 38 (1):31-38. |
| Tumor - kidney | Management of advanced renal cell carcinoma | Satit Siriboonrid | 2016 TJU 37-1 | Satit Siriboonrid. Management of advanced renal cell carcinoma. TJU 2016; 37 (1): 33-46. |

Kidney transplantation

| Topic | Article | Author | Published | Reference |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Kidney transplant | Quality of life and kidney function of living kidney donors at the Faculty of Medicine, Chiang Mai University | Danai Kaewjongprasit , Jakkrit Jun-U, Siwat Phuriyaphan | 2018 TJU 39-1 | Kaewjongprasit D , Jun-U J, Phuriyaphan S. Quality of life and kidney function of living kidney donors at the Faculty of Medicine, Chiang Mai University. TJU 2018; 39 (1):26-35. |
| Kidney transplant | Perioperative results and complications of living donor nephrectomy in Ramathibodi Hospital | Kittiwut Wundee, Pocharapong Jenjitranant, Preamsant Sangkum, Charoen Lee-nanupunth, Kittinut Kijvikai, Wit Viseshsindh, Pokket Sirisreetreerux, Wisoot Khongcharoensombat | 2017 TJU 38-1 | Wundee K, Jenjitranant P, Sangkum P, et al. Perioperative results and complications of living donor nephrectomy in Ramathibodi Hospital. TJU 2017; 38 (1): 11-19. |
| Kidney transplant | Association of exit site of peritoneal dialysis catheter and catheter tip migration in continuous ambulatory peritoneal dialysis patients | Phaderm Kaewjongprasit, Vorapot Choonhaklai, Viroj Chittchang, Somkiat Pumpaisanchai, Nattapong Wongwattanasatien, Tanet Thaidumrong, Sermsin Sindhubodee, Chawawat Gosrisirikul | 2017 TJU 38-2 | Kaewjongprasit P, Choonhaklai V, Chittchang V, et al. Association of exit site of peritoneal dialysis catheter and catheter tip migration in continuous ambulatory peritoneal dialysis patients. TJU 2017; 38 (2): 20-27. |

Surgical result

| Topic | Article | Author | Published | Reference |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Surgical result | Recurrent rate of urethral stricture after urethroplasty in Rajavithi Hospital | Danson Punsanguansuk, Vorapot Choonhaklai | 2018 TJU 39-1 | Punsanguansuk D, Choonhaklai V. Recurrent rate of urethral stricture after urethroplasty in Rajavithi Hospital. TJU 2018;39 (1):1-8. |
| Surgical result | Laparoscopic ureteroneocystostomy for ureterovaginal fistula after hysterectomy: A Ramathibodi Hospital experience | Paiboon lemsupakkul, Kittinut Kijvikai | 2016 TJU 37-1 | lemsupakkul P, Kijvikai K. Laparoscopic ureteroneocystostomy for ureterovaginal fistula after hysterectomy: A Ramathibodi Hospital experience. TJU 2016; 37 (1):17-22. |
| Surgical result | Vesicourethral Alignment Technique in Laparoscopic Radical Prostatectomy at Phramongkutklao Hospital: 5 years' Experience in Continence Outcomes | Satit Siriboonrid, Nattapong Binsri, Weelak Lertpiwan, Arkane Wongsawat, Poonkiat Reungpoca | 2016 TJU 37-1 | Siriboonrid S, Binsri N, Lertpiwan W, et al. Vesicourethral alignment technique in laparoscopic radical prostatectomy at Phramongkutklao Hospital: 5 years' experience in continence outcomes. TJU 2016; 37 (1);23-32. |
| Surgical result | Pneumovesicoscopic Cohen's Cross -trigonal Ureteral Reimplantation for Primary Vesicoureteral Reflux in Children: A Siriraj Hospital 8-year Review | Sukree Semmard, Banasithi Chaiyaprasithi | 2016 TJU 37-2 | Semmard S, Chaiyaprasithi B. Pneumovesicoscopic Cohen's cross -trigonal ureteral reimplantation for primary vesicoureteral reflux in children: A Siriraj Hospital 8-year review. TJU 2016; 37 (2):7-11. |
